

INVESTMENT PROJECT PROFILE

 	
Project title	Aluminum Extrusion Plant, Manufacturing of Aluminium Profiles
Sector	Metal industry
Location	ZE-DO Canton, Bosnia and Herzegovina
Location description	The site for production facility is placed in industrial zone along the motorway A1. Location is in the vicinity of 50 km from Sarajevo.
Company description	Aluminum extrusion is the most important method for the forming of aluminum. Aluminum profiles can be produced in almost all conceivable forms and alloys. Therefore, the applications of aluminum products are almost unlimited. From many different manufacturing processes, the demand in the last decade increased especially for aluminum extrusion. In many areas, extrusions are used more and more frequently and always require more extrusion lines to cover the steadily growing requirements.
Project status	Feasibility study completed - Search for investor in progress
Project description	<p>By establishing the aluminum extrusion plant in Bosnia and Herzegovina the company is able to reduce the most expensive corporate spending. After particular researches, the results show that the energy costs in Bosnia and Herzegovina are among the lowest in Europe. The electricity costs by yearly consumption from 2GWh to 20GWh lies in Bosnia and Herzegovina at 6.55 Ct/KWh. Worldwide leading suppliers of aluminum extrusions from Germany, Austria, or Italy must expect significantly higher electricity costs. In the personnel sector alone there is the opportunity to reduce the expenses on the basis of 50 employees up to 80% (compared with average of DE, AUT and IT). The company will use such high differences for successful measures to multiply their chances on the market. By establishing the extrusion plant in Bosnia and Herzegovina, savings in the energy sector up to 50% (yearly energy consumption volume 11,844 GWh) would be achieved.</p> <p>With this strategy that the project proposers are able to offer, together with the savings in the personnel sector, the sale prices will be significantly lower, up to 20% compared with today's price on the procurement market. In addition to the enormous savings in energy and personnel sector, Bosnia and Herzegovina offers the possibility to purchase favorable and high quality raw aluminum (Aluminij Mostar).</p>

Estimated total Investment cost	10 million EUR	
Inputs provided by local partner	<ul style="list-style-type: none"> - Feasibility study - Business Plan - Presentation - Layout of the plant - Construction project in process - Offer for complete extrusion line from three different manufacturers 	
Investment from foreign partner	Value	Description
	10 000 000 EUR	<ul style="list-style-type: none"> - Purchasing of ground - Processing equipment - Construction facilities
Form of cooperation with foreign partner	Financial	Technical
	Share in capital with buyout option	<ul style="list-style-type: none"> - Freedom of decision in operative business - Investors contribution via his experience and intercompany network in the sector of customer procurement - Company structure: Ltd (doo in BiH) - The other elements for the participation agreement by negotiation
