

CORAL CONSULTING SERVICE

INVESTMENT PROJECT PROFILE

 	
Project title	Construction of the factory for production of ferrosilicon in Gornji Vakuf/Uskoplje
Sector	Metal sector, Metallurgy - ferrosilicon production
Location	Municipality of Gornji Vakuf / Uskoplje, Central Bosnian Canton
Location description	Plant and equipment for the production of alloys (ferrosilicon, feromagnesium and silicon metal) is planned to be built on the site of the industrial zone "Batuški lug". Distance from the regional road R-439 is 0.2 km, and from the center of the municipality is 1 km. Distance from the railroad is 60 km (Jablanica), and from the airport 110 km (city of Mostar), from the main seaport the distance is 184 km (Port Ploče).
Project status	Concept – business idea
Project description	This project proposes construction of manufacturing plant and production of alloys (ferrosilicon, ferrosilicomagnesium and silicon-metal) on the location of " Batuški lug" in the municipality of Gornji Vakuf – Uskoplje. The site location would consist two electric-arc furnaces, which have a designed power of a total of 48 MVA (2 X 24 MVA) and associated infrastructure (storage of raw materials, facilities for washing and crushing quartz, quartz plant for transport to the dispenser, plant transport coke plant, a freight timber, a facility for the delivery of raw materials for the production feromagnesium, softening plant for process water, warehouse finished products, etc.), and the wardrobe and the bathroom for employees, restaurant facility and management facility. The plan is designed to have a factory working 24 hours a day in four shifts. For this project it is necessary to employ around 100 people.
Estimated total Investment cost	10 335 000 EUR
Form of cooperation with foreign partner	Possible public private partnership
