

CORAL CONSULTING SERVICE

INVESTMENT PROJECT PROFILE

Project title	Construction of cable railway between Hrasnica and Igman
Sector	Tourism
Location	Settlement Hrasnica – Mountain Igman
Location description	From geomorphological aspect this location is adequate for funicular construction especially in hillside parts where inclination goes from 5% to 30%. Proposed location for Hrasnica – Igman funicular is mostly in oak and hornbeam zone. Because of its vegetation variety, this location is interesting during all four seasons. Traffic connection to the beginning station is by Ilidza – Hrasnica road that is already built. Power supply should be 10 kW cable connected to exiting power network. Natural characteristics and nearness of Olympic centers Bjelasnica and Igman, and the city, gives relevant development potentials.
Project status	Business idea, Pre-feasibility study
Project description	Difficult traffic communication to the Olympic mountains and the need for faster and more economical mass transfer to these mountains were the main reasons for Hrasnica - Igman funicular idea. Planning guidelines defined the length of this funicular of 6 223 m with start station near sport and recreation center in Hrasnica (Famous football stadium) and end station on the plateau in front of Igman Hotel. It also defines one middle station on the third kilometer of the route. This funicular would be equipped with gondolas – cabins with eight seats.
Estimated total investment cost	App. 10 million EUR (Already invested in the Project app. 250,000 EUR)
Type of cooperation with foreign partner	Concession
