

INVESTMENT PROJECT PROFILE

Project title	Construction of facility for production of kaolin and feldspar	
Sector	Natural resources	
Location	Srbac-Kobaš	
Location description	The site is placed near river Sava, around 70 km north of Banja Luka	
Project status	Preparation of feasibility study for construction of production facility is in progress (with some of the best Czechs experts, from the company "TVAR COM")	
Project description	<p>The main objective of this project is construction of facility that will provide production of kaolin and feldspar, based on available raw material. The raw material contains 15-18% of kaolin, and around 28% of feldspar. All mineral and chemical analysis have already been done. The third mineral, quartz, is also included in a raw material, with possibility for production and sale as fine sand and gravel. The facility will contain one of the latest technologies and will allow profit earning: The price of current product (only a raw material is sold at this moment) is 10-12 EUR, while the average price of produced kaolin is 150 EUR/t and 60 EUR/t for feldspar. Return of investment will be no more than 3-4 years.</p>	
Estimated total investment cost	app. 3 to 5 million EUR	
Inputs provided by local partner	Value	Description
	800 000 EUR	All prefeasibility studies, the building site fully prepared with all needed infrastructure, all laboratories work, mineral and chemical analysis done, Government grant, special loan arrangements
Inputs required from foreign partner	2-3 million EUR	
Form of cooperation with foreign partner	Joint venture
