Developed documents	Physical planning documents: <ul style="list-style-type: none"> • the project is in compliance with the physical planning documents Project documentation: <ul style="list-style-type: none"> • master project Construction permits: <ul style="list-style-type: none"> • building permit
Project description	Raising the quality of the Summer Theatre physical capacities, allowing a larger number of visitors and a more representative auditorium, thereby improving Opatija's competitive advantages with the effect on further development of Kvarner and wider area destinations. The Summer Theatre roofing will have a significant effect on its functionality and usability. The roofing will include the placement of a movable roof structure on the surface area of 3,300 m2 out of the total area of 7,200 m2, all as recommended by and subject to the consent of the competent Cultural Heritage Conservation Authority in Rijeka. The roofing of the Opatija Summer Stage will allow stage, music and entertainment performances of national and international character for a large audience – regardless of weather conditions. The large theatre roofed under this project has an auditorium of 2,500 seats.
Estimated value of the project	After the development of design documents
Realization model	Open negotiation options
